XOps Engineer

RESUME SUMMARY:

Senior XOps Engineer with 7 years of hands-on experience bridging the gap between **DevOps, MLOps, and OR-Ops**. I specialize in architecting high-availability production systems, leveraging a robust **MLOps & Data Engineering** stack including **ZenML** for orchestration, **MLflow** for lifecycle tracking, and **Feast** for feature management. My expertise is centered on **OR-Ops** using **FICO Xpress** and **Gurobi solvers**, alongside the seamless migration of legacy On-premises to cloud platform via Python-driven automation.

Expert in eliminating manual bottlenecks by designing robust **Docker** and **Kubernetes** pipelines and **Jenkins** CI/CD workflows. I bring a strong focus **on debugging** and **restoring servers after failures**, ensuring system resilience through proactive **cleanup, backup management,** and **environment optimization**. Highly proficient in **Python** and **Linux script and command**, I am a proactive problem-solver dedicated to scaling complex machine learning and optimization architectures through rigorous API testing and meticulous infrastructure orchestration.

TECHNICAL SKILLS:

- Cloud Platforms: **AWS (EC2, Lambda,EFS, S3, ELB, Auto scaling IAM, CloudWatch, ECS)**
- Programming Languages: **Python, Bash(Linux script), R**
- MLOps & Data Engineering: **ZenML (Orchestration), MLflow (Lifecycle Tracking), Feast (Feature Store)**
- Version Control: **Git, GitHub, Bitbucket, GitLab**
- Database: **Oracle SQL**
- Operating Systems: **Linux (Ubuntu, RHEL, CentOS)**
- Automation & Orchestration: **Jenkins, Docker, kubernetes**
- Troubleshooting: **Strong debugging skills to resolve complex Linux server issues.**
- Other Skills: **Problem-Solving, Critical Thinking, Leadership, Enthusiasm, Project Management, Logical Reasoning, Time Management and Prioritization skills.**

PROFESSIONAL EXPERIENCE:

1. Sr. Associate - Projects (Kolkata India*)*

Cognizant Technology Solutions **2 Jun 2025 - PRESENT**

Job Description:

- Architected and fully automated OR project deployments using Jenkins, Docker, and Kubernetes, achieving a **90% reduction in manual effort**.
- Redesigned deployment architecture to eliminate server-side dependencies and resolve complex solver lic access constraints for the entire engineering team.
- Architected production-grade MLOps ecosystem by integrating ZenML for orchestration, Feast for feature management, and MLflow for lifecycle tracking, creating a seamless path from development to production.
- Engineered a scalable CI/CD pipeline for ML projects from the ground up, ensuring consistent model performance and high availability.
- Contributed to a migration automation project aimed at streamlining legacy system transitions to modern platforms,
- Developed and optimized automation scripts to reduce manual effort and improve data accuracy during migration.
- Collaborated with cross-functional teams to identify migration bottlenecks and implement scalable automation solutions.
- Ensured compliance with JNJ's data governance and security standards throughout the migration lifecycle.
- Documented processes and created reusable automation templates for future migration initiatives.

2. Senior Software Engineer (Bengaluru India)

Rxlogix Corporation India Private Limited **24 Jun 2019 - 30 May 2025**

Job Description:

- **Cost Optimization:** Successfully reduced **AWS infrastructure costs by 40%** by optimizing resource allocation, utilizing reserved instances, and implementing auto-scaling strategies, ensuring significant savings without compromising performance.
- Implemented **automatic start/stop of EC2 servers using AWS Lambda and CloudWatch,** optimizing infrastructure costs and ensuring servers are only running when needed.
- Developed **serverless deployment** using **AWS Lambda and ECS Fargate** to support scalable ML workloads, resulting in a **30% cost reduction**.
- Automated the Deployment of ML builds and server configuration to the development server via Jenkins.
- Authoring and executing automation test scripts for Formal system validation (IQ/OQs) and other SDLC documentation activities.
- By the implementation of automated JSON testing **significantly reduced manual testing efforts**.
- Automated the ETL monitoring and ETL status notification.
- configure **Gunicorn** as the WSGI server to host a Flask-based REST API, ensuring optimal performance and scalability by configuring multiple worker processes.
- Implemented **PM2** as a process manager to ensure high availability of the application, automating restart and recovery processes, and managing the lifecycle of the Gunicorn processes.

AWARDS:

- Awarded with the **Standout Performer Award for 2022** for delivering projects and demonstrations on schedule to various pharmaceutical clients.
- Best **Team Player Award** in 2021 for continuous support to client demo and teammate.

EDUCATION:

- **Bachelor of Engineering in Computer Science & Engineering(V.T.U)**

  DR. Ambedkar Institute of Technology, Bengaluru | 2015 – 2019 | Secured 8.35 CGPA
- **Higher Secondary Education (Class 12 - CBSE)**

  D.A.V. Public School, Sector-4, Bokaro | 2015 | Secured 79.67%
- **Secondary Education (Class 10 - CBSE)**

  D.A.V. Public School, Sector-4, Bokaro | 2013 | Secured 9.4 CGPA

COURSES/CERTIFICATIONS:

- AWS Certified DevOps Engineer – Professional | Oct-2023
- Amazon Web Services (AWS)
- Docker Certified Associate | May2021
